

NovaPay Digital Bank

Zero-Downtime CI/CD Pipeline with Compliance Gates

Slide 1 — Title

NovaPay Digital Bank

Zero-Downtime CI/CD Pipeline with Compliance Gates

DevOps & Cloud Engineer Assessment

Slide 2 — Business Problem

NovaPay's legacy deployment process relied on manual SSH deployments.

Key problems:

- High deployment risk
- Long recovery time
- No automated compliance validation

- Limited deployment frequency
- Manual security checks
- Risk of production downtime

Target:

- Commit-to-production under 2 hours
- Five-nines availability
- Automated security and compliance gates

Slide 3 — Proposed Architecture
